

ALL THE DAY HOLIDAY

This Ohio based four-piece has freshly come out of nowhere. Garnering an immense amount of attention and interest, things have picked up quickly for All the Day Holiday. While recently signing to Linc Star Records the band is in the midst of developing a strong foundation by building their fan base and voicing their perspectives and passions on life, people, living, and loving the fellow man.

While it's rhythmically driven, the music is sophisticated and melodic. The songs have depth and purpose. The guitars and vocals give the music an identity that embraces the music's soul and perspective while the rhythm section lays the foundation and body of the music giving it it's unique swagger, energy, and direction...almost as if it had a definitive bone and muscle structure.

Inspired by art, experience, and the wonderful mystery of life they are multi-dimensional. These fresh faces in the music scene will soon become familiar. For fans of Death Cab for Cutie, Sunny Day Real Estate, Coldplay, Muse, and Jimmy Eat World, All the Day Holiday is a band you will be more than pleased with. Their first full-length album, "The Things We've Grown To Love," just became available at shows—make sure to tell your friends before they tell you and be expecting big things from them in 2009 and beyond.
